

THE SCENT KIT

PREPARE AND PROTECT YOUR LOVED ONES
BEFORE THEY GO MISSING

HOW SCENT KITS HELP RESPONDERS FIND THE LOST FAST AND BRING THEM HOME SAFE

WHAT ARE SCENT PRESERVATION KITS® AND HOW DO THEY WORK?

The **Scent Preservation Kit®** is used to pre-collect and preserve a person's unique scent ahead of time and gives responding K-9 Units a head start during the search by providing the trailing dogs with an uncontaminated scent article. **Your scent is as identifiable as your fingerprint to a trained K-9 and can last up to 10 years in our kit.**

The preserved scent isn't touched by other family members, pets, or responders. This means that K-9 Units do not have to go through the time-consuming dismissal process to determine who's scent is actually on the article. They can begin searching immediately and with greater accuracy when every minute counts.

Everything you need to collect and securely store the scent of each family member is right in the box. Simply **SWIPE** the sterile gauze pad under the arms 10 times and place the pad in the specially-treated jar. Add the identification information to the label and **SEAL** the lid with the supplied tamper-proof tape. **STORE** the scent in the privacy of your home in a place away from high temps or direct sunlight. **If you ever need it, you'll have the best possible location resource to present to emergency K-9 responders.**

In addition to collecting and storing a person's unique scent, the kit now includes an **Individual Preparedness Plan** flash drive to store important identification information to help responders locate a missing person faster.

HAVING A SCENT KIT PREPARED
HELPS RESPONDERS FIND THE LOST FAST

"It lets responders hit the ground
running as soon as they get a report
of a missing person."

- Paul Coley
CEO/Founder Scent Evidence K9

ALZHEIMER'S DISEASE AND WANDERING

For people diagnosed with a memory disorder or family members caring for a loved one with Alzheimer's Disease, the dangers of wandering and getting lost are a major concern. The Alzheimer's Association states that **60% or 3 out of 5 people with Dementia will wander and go missing.**

According to the Center for Disease Control (CDC), the prevalence of autism in U.S. children increased by 119.4 % from 2000 (1 in 150) to 2010 (1 in 68). **The American Pediatric Association states that almost 50% of these children will go missing at least once before the age of 17.**

Use the included Individual Preparedness Plan Flash Drive to prefill any triggers or calming actions for responders.

SCENT FACTS

- Your scent is like your fingerprint.
- You can never lose your scent, forget to wear it, or take it off.
- Scent doesn't break or malfunction.
- Scent preservation does not require charging or batteries like a GPS tracker.
- Scent never loses its signal or goes out of range.
- A Scent Kit lasts up to 10 years.
